### I. For Functional Requirement #1 (Login)

#### I.I CreateAccount

Use Case ID:	#1-1		
Use Case Name:	CreateAccount		
Created By:	Jain Divisha	Last Updated By:	Jain Divisha
Date Created:	7 September 2025	Date Last Updated:	7 September 2025

Actor:	User
Description:	Allows a person to create an account with HobbyHive and be registered as a User.
Pre-Conditions:	None
Post-Conditions	An account with the details provided by the User is created.
Priority:	High
Frequency Of Use:	High
Flow Of Events:	<ol style="list-style-type: none"><li>1. The system prompts the User to input particular details like role, username, password, email and profile picture.</li><li>2. The User enters the required information and clicks on “Create Account” to confirm details.</li><li>3. The system includes the VerifyUser use case to validate the entered information (check for unique email/username and proper format).</li><li>4. An account with the role and other provided details is created for the User.</li></ol>
Alternative Flows:	<p><b>AF-S2a:</b> If User inputs username that is being used by another account already</p> <ol style="list-style-type: none"><li>1. The system displays a message “Username is already taken. Please enter a new username.”</li><li>2. The system returns to step 2.</li></ol> <p><b>AF-S2b:</b> If User inputs email that is linked to a</p>

	<p>pre-existing account</p> <ol style="list-style-type: none"> <li>1. The system displays a message “Email is already linked to an account”</li> <li>2. The system returns to step 2.</li> </ol>
Exceptions:	If any required information is missing or invalid, an error message “Please enter all valid details” is displayed.
Includes:	VerifyUser
Extends:	None
Special Requirements:	The system must validate all input data and store it securely.
Assumptions:	None
Notes and Issues:	None

## I.II ModifyAccountInfo

Use Case ID:	#1-2		
Use Case Name:	ModifyAccountInfo		
Created By:	Jain Divisha	Last Updated By:	Jain Divisha
Date Created:	7 September 2025	Date Last Updated:	7 September 2025

Actor:	User
Description:	Allows User to change details linked to their account.
Pre-Conditions:	The User must have an account with HobbyHive and must be logged into the account.
Post-Conditions	The account details related to the User are modified.
Priority:	Medium
Frequency Of Use:	Medium
Flow Of Events:	<ol style="list-style-type: none"> <li>1. The User opens the Account Menu and clicks on <b>Modify Account Info</b>.</li> <li>2. The system redirects the User to a new page with options <b>Change Password</b>, <b>Change Email</b>, <b>Change Username</b>, <b>Change Profile Picture</b>.</li> <li>3. If User clicks on <b>Change Password</b> <ol style="list-style-type: none"> <li>3.1. The system prompts User to enter <b>New Password</b> and <b>Confirm New Password</b>. This information is displayed as dots which can be unmasked by the user by clicking on an eye icon in the text bar.</li> <li>3.2. User inputs required details and clicks on Confirm Changes.</li> <li>3.3. The system includes the VerifyUser use case to validate matching fields and confirm the current password before saving changes.</li> <li>3.4. The system updates the User's account information.</li> </ol> </li> </ol>
Alternative Flows:	<b>AF-S3a:</b> If User clicks on <b>Change Email</b> <ol style="list-style-type: none"> <li>1. The system prompts User to enter New Email and Confirm New Email.</li> <li>2. User inputs required details and clicks on Confirm Changes.</li> </ol>

	<p>3. The system includes the VerifyUser use case to check if the email is not already associated with another account.</p> <p>4. The system updates the User's account information.</p> <p><b>AF-S3b:</b> If User clicks on <b>Change Username</b></p> <ol style="list-style-type: none"> <li>1. The system prompts User to enter New Username and Confirm New Username.</li> <li>2. User inputs required details and clicks on Confirm Changes.</li> <li>3. The system includes the VerifyUser use case to check if the username is not already associated with another account.</li> <li>4. The system updates the User's account information.</li> </ol> <p><b>AF-S3c:</b> If User clicks on <b>Change Profile Picture</b></p> <ol style="list-style-type: none"> <li>1. The system prompts User to select a new picture.</li> <li>2. The User selects a picture with appropriate dimensions.</li> <li>3. The system updates the User's account information</li> </ol>
Exceptions:	If the data provided by the User in both the fields does not match, the system issues an error message "Mismatched Data! Please ensure correct entry."
Includes:	VerifyUser
Extends:	None
Special Requirements:	The system must verify data if both fields match and only then modify the Account Information.
Assumptions:	The User is already logged in.
Notes and Issues:	None

### I.III Login

Use Case ID:	#1-3		
Use Case Name:	Login		
Created By:	Jain Divisha	Last Updated By:	Jain Divisha
Date Created:	7 September 2025	Date Last Updated:	7 September 2025

Actor:	User
Description:	Allows User to login to and access HobbyHive with their Account Information.
Pre-Conditions:	<ol style="list-style-type: none"> <li>1. User has an account with HobbyHive that has been made through the CreateAccount use case.</li> <li>2. User is logged out of the system.</li> </ol>
Post-Conditions	The User is logged into and can access HobbyHive.
Priority:	High
Frequency Of Use:	High
Flow Of Events:	<ol style="list-style-type: none"> <li>1. The system prompts User to enter email/username and password.</li> <li>2. The User provides the information. The password is masked as dots, but the User can choose to unmask it by clicking on the eye icon in the text bar.</li> <li>3. The User clicks on Login.</li> <li>4. The system includes the VerifyUser use case to verify the provided credentials against the database.</li> <li>5. If credentials are correct, access is granted.</li> </ol>
Alternative Flows:	<b>AF-S4:</b> If upon verification, the information does not match with any entry <ol style="list-style-type: none"> <li>1. The system outputs a message “This account does not exist. Please try again!” for 3 seconds.</li> <li>2. The system returns to step 1</li> </ol>
Exceptions:	If any required information is missing, an error message is displayed.
Includes:	VerifyUser

Extends:	None
Special Requirements:	System must validate user input data
Assumptions:	The User has an account with HobbyHive.
Notes and Issues:	None

## I.IV VerifyUser

Use Case ID:	#1-4		
Use Case Name:	VerifyUser		
Created By:	Jain Divisha	Last Updated By:	Jain Divisha
Date Created:	7 September 2025	Date Last Updated:	7 September 2025

Actor:	System (triggered during user interactions in CreateAccount, ModifyAccountInfo and Login)
Description:	Ensures the user-provided information (email, username, password, or other credentials) is valid, unique (when required), and matches the system records before proceeding with account creation, modification, or login.
Pre-Conditions:	<ol style="list-style-type: none"> <li>User is in the process of creating, modifying, or accessing their account.</li> <li>Relevant input fields have been provided by the user.</li> </ol>
Post-Conditions	<ol style="list-style-type: none"> <li>User data is verified for correctness, validity, and uniqueness (as applicable).</li> <li>If verification fails, an appropriate error is displayed.</li> </ol>
Priority:	High
Frequency Of Use:	High
Flow Of Events:	<ol style="list-style-type: none"> <li>The system receives input data (email, username, password, etc.) from the primary use case.</li> <li>The system checks for mandatory fields (none should be empty).</li> <li>System validates data format:             <ol style="list-style-type: none"> <li>Email is in valid format (or) Username follows allowed character rules.</li> <li>Password meets security criteria (if relevant).</li> </ol> </li> <li>If invoked during CreateAccount:             <ol style="list-style-type: none"> <li>The system checks that email and username is not already in use.</li> </ol> </li> <li>The system returns verification result (success or specific error)</li> </ol>

Alternative Flows:	<p><b>AF-S1:</b> Missing mandatory fields</p> <ol style="list-style-type: none"> <li>1. The system displays an error message.</li> <li>2. It returns to the data entry step in the calling use case.</li> </ol> <p><b>AF-S2:</b> Invalid email format</p> <ol style="list-style-type: none"> <li>1. The system displays an error message</li> <li>2. It returns to the data entry step in the calling use case.</li> </ol> <p><b>AF-S4a:</b> If invoked during Login:</p> <ol style="list-style-type: none"> <li>1. The system compares provided credentials with stored records.</li> <li>2. Moves to step 5.</li> </ol> <p><b>AF-S4b:</b> If invoked during ModifyAccountInfo:</p> <ol style="list-style-type: none"> <li>1. The system checks for conflicts (e.g., email already in use, username already in use) and verifies if the current password is the same as the new password before applying changes.</li> <li>2. Moves to step 5</li> </ol>
Exceptions:	None
Includes:	None
Extends:	None
Special Requirements:	All passwords must be hashed. Verification must be completed in under 3 seconds.
Assumptions:	The database of users is always up to date and available for verification queries.
Notes and Issues:	Future versions can include multi-factor authentication (MFA).

## II. For Functional Requirement #2 (Participant)

### II.I SearchEvent

Use Case ID:	#2-1		
Use Case Name:	SearchEvent		
Created By:	Afreen Mahtaj	Last Updated By:	Jain Divisha
Date Created:	8 September 2025	Date Last Updated:	23 September 2025

Actor:	Participant
Description:	Allows a Participant to search for events using keywords, categories, dates, and locations. The system ensures valid inputs and displays only matching events.
Pre-Conditions:	<ol style="list-style-type: none"> <li>Participant must be logged in.</li> <li>Events must exist in the database.</li> </ol>
Post-Conditions	<ol style="list-style-type: none"> <li>A filtered list of events is displayed to the Participant.</li> </ol>
Priority:	High
Frequency Of Use:	High
Flow Of Events:	<ol style="list-style-type: none"> <li>Participant navigates to the Search bar.</li> <li>System prompts Participant to enter filters (keyword, category, date, location).</li> <li>Participant enters one or more search criteria.             <ol style="list-style-type: none"> <li>Keyword: text of length 1–255.</li> <li>Category: selected from a predefined list.</li> <li>Date: valid date in YYYY-MM-DD format.</li> <li>Location: set by address and radius in km.</li> </ol> </li> <li>Participant clicks “Search.”</li> <li>System validates inputs.</li> <li>System retrieves and displays all events matching criteria within the specified circular boundary.</li> </ol>
Alternative Flows:	<b>AF-S1:</b> If no results match, the system displays “No events found. Try adjusting filters.”
Exceptions:	<ol style="list-style-type: none"> <li>Invalid category selection:             <ol style="list-style-type: none"> <li>System shows error “Invalid category.”</li> </ol> </li> </ol>

	<p>2. Invalid date format:</p> <p>2.1. System shows error “Please enter date in YYYY-MM-DD format.”</p> <p>3. Empty keyword or &gt;255 characters:</p> <p>3.1. System shows error “Keyword must be 1–255 characters.”</p>
Includes:	None
Extends:	None
Special Requirements:	<p>1. Search results must be displayed within 2 seconds.</p> <p>2. Location-based search must calculate distance using defined radius.</p>
Assumptions:	<p>1. The event database is indexed and supports filtering efficiently.</p>
Notes and Issues:	None

## II.II JoinEvent

Use Case ID:	#2-2		
Use Case Name:	JoinEvent		
Created By:	Afreen Mahtaj	Last Updated By:	Jain Divisha
Date Created:	8 September 2025	Date Last Updated:	23 September 2025

Actor:	Participant
Description:	Allows a Participant to join an event. Joining grants access to group chat and updates.
Pre-Conditions:	<ol style="list-style-type: none"> <li>Participant must be logged in.</li> <li>Event must exist.</li> </ol>
Post-Conditions	<ol style="list-style-type: none"> <li>Participant becomes a Member of the event.</li> <li>Participant gains access to group chat.</li> </ol>
Priority:	High
Frequency Of Use:	Medium
Flow Of Events:	<ol style="list-style-type: none"> <li>Participant views event details.</li> <li>Participant clicks “Join” button.</li> <li>Participant becomes a member of the Event and is added to the Group Chat.</li> </ol>
Alternative Flows:	<b>AF-S2:</b> If the event already has enough members: <ol style="list-style-type: none"> <li>A message is sent to the participant “Event is Full”</li> </ol>
Exceptions:	Event does not exist, system shows “This event is unavailable.”
Includes:	None
Extends:	None
Special Requirements:	None
Assumptions:	<ol style="list-style-type: none"> <li>Groups may have maximum capacity set by Host.</li> </ol>
Notes and Issues:	None

## II.III RecommendEvent

Use Case ID:	#2-3		
Use Case Name:	RecommendEvent		
Created By:	Afreen Mahtaj	Last Updated By:	Jain Divisha
Date Created:	8 September 2025	Date Last Updated:	23 September 2025

Actor:	Participant
Description:	System recommends events to a Participant based on preferences (categories, hobbies), popularity, and proximity.
Pre-Conditions:	<ol style="list-style-type: none"> <li>Participant must be logged in.</li> <li>Event database must exist.</li> </ol>
Post-Conditions	<ol style="list-style-type: none"> <li>Recommended events are displayed on Participant's homepage.</li> </ol>
Priority:	Medium
Frequency Of Use:	Medium
Flow Of Events:	<ol style="list-style-type: none"> <li>Participant navigates to "Recommended Events."</li> <li>System retrieves Participant's preferences (categories, hobbies, followed users).</li> <li>System identifies events based on:             <ol style="list-style-type: none"> <li>Matching categories/hobbies.</li> <li>Event popularity.</li> <li>Location proximity.</li> </ol> </li> <li>System displays recommended events in a ranked list.</li> </ol>
Alternative Flows:	<b>AF-S1:</b> If no personalized matches exist, the system displays popular nearby events.
Exceptions:	If the system fails to fetch user preferences, fallback to general recommendations.
Includes:	None
Extends:	None
Special Requirements:	<ol style="list-style-type: none"> <li>Recommendations should refresh daily.</li> <li>Distance calculations must be accurate to within</li> </ol>

	1 km.
Assumptions:	User preference data is up to date.
Notes and Issues:	None

## II.IV FollowUser

Use Case ID:	#2-4		
Use Case Name:	FollowUser		
Created By:	Afreen Mahtaj	Last Updated By:	Jain Divisha
Date Created:	8 September 2025	Date Last Updated:	23 September 2025

Actor:	Participant
Description:	Allows a Participant to follow another User (Host or Participant) to see their updates and events more prominently in recommendations.
Pre-Conditions:	<ol style="list-style-type: none"> <li>Participant must be logged in.</li> <li>The other User exists in the system.</li> </ol>
Post-Conditions	<ol style="list-style-type: none"> <li>Followed User is added to Participant's "Following" list.</li> <li>Participant receives updates about followed User's activities.</li> </ol>
Priority:	Medium
Frequency Of Use:	Medium
Flow Of Events:	<ol style="list-style-type: none"> <li>The participant visits another User's profile.</li> <li>Participant clicks the "Follow" button.</li> <li>System adds User to "Following" list.</li> <li>System confirms: "You are now following this user."</li> <li>The system notifies the followed User: "You have a new follower."</li> </ol>
Alternative Flows:	<b>AF-S1:</b> If Participant clicks "Unfollow," the system removes User from the following list.
Exceptions:	<ol style="list-style-type: none"> <li>If the target User no longer exists, the system displays: "This user is unavailable."</li> </ol>
Includes:	None
Extends:	None
Special Requirements:	<ol style="list-style-type: none"> <li>Notifications must be sent for new follows.</li> <li>Unfollow should remove all related</li> </ol>

	notifications/recommendations.
Assumptions:	All Users allow being followed unless the account is deleted.
Notes and Issues:	None

## II.V LeaveEvent

Use Case ID:	#2-5		
Use Case Name:	LeaveEvent		
Created By:	Jain Divisha	Last Updated By:	Jain Divisha
Date Created:	11 September 2025	Date Last Updated:	23 September 2025

Actor:	Participant
Description:	Allows a Participant to leave an Event they are no longer attending.
Pre-Conditions:	Participant is part of an Event.
Post-Conditions:	Participant is removed from the Event.
Priority:	Medium
Frequency Of Use:	Low
Flow Of Events:	<ol style="list-style-type: none"> <li>Participant visits the group chat of the event that they have previously joined.</li> <li>Participant clicks the LEAVE button at the top of the group chat.</li> <li>Participant is removed from the Event and Groupchat.</li> </ol>
Alternative Flows:	None
Exceptions:	None
Includes:	None
Extends:	JoinEvent
Special Requirements:	None
Assumptions:	None
Notes and Issues:	None

## II.VI FlagEvent

Use Case ID:	#2-6		
Use Case Name:	FlagEvent		
Created By:	Chua Jing Yi, Jax	Last Updated By:	Jain Divisha
Date Created:	11 September 2025	Date Last Updated:	23 September 2025

Actor:	Participant
Description:	Allows a Participant to flag a listed event for inappropriate content.
Pre-Conditions:	<ol style="list-style-type: none"> <li>Participant must be logged in.</li> <li>The event must exist in the system.</li> </ol>
Post-Conditions	<ol style="list-style-type: none"> <li>The event is flagged and recorded in the system.</li> <li>Admins are notified of the flagged event.</li> <li>Participant may see a confirmation message that the event has been flagged.</li> </ol>
Priority:	High
Frequency Of Use:	Low–Medium
Flow Of Events:	<ol style="list-style-type: none"> <li>Participant visits an Event page.</li> <li>Participant click the “Flag Event” option.</li> <li>The system prompts Participant to select a reason for flagging.</li> <li>Participant selects a reason and confirms submission.</li> <li>System records the flag in the database.</li> <li>System confirms: “This event has been flagged for review.”</li> <li>System notifies Admin for review and action.</li> </ol>
Alternative Flows:	<p><b>AF-S1:</b> If the Participant cancels after being prompted for a reason, no flag is recorded.</p> <p><b>AF-S2:</b> If the Participant has already flagged this event, the system prevents duplicate flags and displays: “You have already flagged this event.”</p>
Exceptions:	If the Event no longer exists “This event is unavailable.”
Includes:	ModerateEvents

Extends:	None
Special Requirements:	The system should log reasons and timestamps for auditing purposes. A single Participant should not be able to repeatedly flag the same event.
Assumptions:	Participants can flag any event that exists in the system.
Notes and Issues:	None

### III. For Functional Requirement #3 (Host)

#### III.I CreateEvent

Use Case ID:	#3-1		
Use Case Name:	CreateEvent		
Created By:	Swetha Sudhakar	Last Updated By:	Chua Jing Yi Jax
Date Created:	8 September 2025	Date Last Updated:	21 September 2025

Actor:	Host
Description:	Allows Hosts to create an event on HobbyHive by providing event details such as title, description, category, date, time, and location.
Pre-Conditions:	The Host must be logged in.
Post-Conditions	A new event is created and visible to Participants for joining.
Priority:	High
Frequency Of Use:	Medium–High
Flow Of Events:	<ol style="list-style-type: none"> <li>1. Host clicks on "Create Event."</li> <li>2. The system prompts the Host to input event details (title, description, category, date, time, location, capacity).</li> <li>3. Host waits for Admin to review the event via ReviewEventst enters all required details and uploads an optional image/banner.</li> <li>4. Host confirms creation.</li> <li>5. The system validates details and creates the event in a Pending State.</li> <li>6. If approved, the event becomes visible to Participants for joining.</li> <li>7. If rejected, the Host is notified of the reason for rejection.</li> </ol>
Alternative Flows:	<p><b>AF-S1:</b> If mandatory details are missing, the system shows “Please fill in all required fields.”</p> <p><b>AF-S2:</b> If invalid date/time is entered, the system shows “Invalid scheduling information.”</p>

Exceptions:	If there is a Database error, the system sends out a message “Event could not be created. Please try again later!”
Includes:	ReviewEvent, CreateGroupChat
Extends:	None
Special Requirements:	Events must have a unique title and valid date/time.
Assumptions:	Hosts have stable network access.
Notes and Issues:	Need to consider timezone handling for events.

### III.II ManageParticipants

Use Case ID:	#3-2		
Use Case Name:	ManageParticipants		
Created By:	Swetha Sudhakar	Last Updated By:	Jain Divisha
Date Created:	8 September 2025	Date Last Updated:	23 September 2025

Actor:	Host
Description:	Allows Hosts to manage event participants by adding and viewing participant lists.
Pre-Conditions:	Host must be logged in and have at least one active event.
Post-Conditions	Participant statuses are updated based on Host's actions.
Priority:	High
Frequency Of Use:	Medium
Flow Of Events:	<ol style="list-style-type: none"> <li>1. Host selects their event from the dashboard.</li> <li>2. Host opens the Participants tab.</li> <li>3. Host reviews participants</li> <li>4. Host can remove participants if necessary.</li> <li>5. System updates the participant list and sends notifications.</li> </ol>
Alternative Flows:	<b>AF-S1:</b> If participant limit is reached, the system shows "Maximum participants reached."
Exceptions:	None
Includes:	None
Extends:	None
Special Requirements:	Notifications must be sent in real time.
Assumptions:	Hosts act fairly and follow community guidelines.
Notes and Issues:	Consider escalation to Admin if Host repeatedly removes participants unfairly.

### III.III EditCancelEvents

Use Case ID:	#3-3		
Use Case Name:	EditCancelEvents		
Created By:	Swetha Sudhakar	Last Updated By:	Chua Jing Yi Jax
Date Created:	8 September 2025	Date Last Updated:	21 September 2025

Actor:	Host
Description:	Allows Hosts to edit or cancel existing events.
Pre-Conditions:	Host must have an active event.
Post-Conditions	Event details are updated OR event is cancelled. Participants are notified.
Priority:	High
Frequency Of Use:	Medium
Flow Of Events:	<ol style="list-style-type: none"> <li>1. Host selects an event.</li> <li>2. Host clicks Edit or Cancel.</li> <li>3. If Edit, the system shows editable fields.</li> <li>4. Host updates fields and confirms.</li> <li>5. If Cancel, Host confirms cancellation.</li> <li>6. System applies changes and notifies participants via NotifyChanges.</li> </ol>
Alternative Flows:	<b>AF-S1:</b> If edited event date is in the past, system shows "Invalid event date."
Exceptions:	Database error during update.
Includes:	NotifyChanges
Extends:	None
Special Requirements:	Event cancellation must automatically close group chats.
Assumptions:	Hosts edit responsibly.
Notes and Issues:	Ensure data consistency when updating/cancelling events.

### III.IV NotifyChanges

Use Case ID:	#3-4		
Use Case Name:	NotifyChanges		
Created By:	Swetha Sudhakar	Last Updated By:	Jain Divisha
Date Created:	8 September 2025	Date Last Updated:	23 September 2025

Actor:	System
Description:	Automatically notifies Participants of event updates or cancellations.
Pre-Conditions:	An event must exist and have Participants.
Post-Conditions	Notifications are delivered to all Participants.
Priority:	High
Frequency Of Use:	Medium
Flow Of Events:	<ol style="list-style-type: none"> <li>1. Host edits or cancels an event.</li> <li>2. The system detects the change.</li> <li>3. The system generates notifications.</li> <li>4. All Participants receive the notification via dashboard and group chat.</li> </ol>
Alternative Flows:	<b>AF-S1:</b> If Participant has disabled notifications, updates are shown only in dashboard.
Exceptions:	Notification delivery fails due to connectivity issues.
Includes:	None
Extends:	LeaveEvent
Special Requirements:	Notifications must be near real-time (< 1 min).
Assumptions:	Participants check their dashboard/group chat regularly.
Notes and Issues:	Consider adding email alerts as backup.

## IV. For Functional Requirement #4 (Admin)

### IV.I RemoveUsers

Use Case ID:	#4-1		
Use Case Name:	RemoveUsers		
Created By:	Jain Divisha	Last Updated By:	Ishita
Date Created:	7 September 2025	Date Last Updated:	20 September 2025

Actor:	Admin
Description:	Allows Admin to remove a User by their username for a specified duration.
Pre-Conditions:	Admin is logged into their HobbyHive account.
Post-Conditions	A User account is removed from HobbyHive and the email can not be used to make future accounts.
Priority:	High
Frequency Of Use:	Low

## IV.II ReviewEvents

Use Case ID:	#4-2		
Use Case Name:	ReviewEvents		
Created By:	Jain Divisha	Last Updated By:	Ishita
Date Created:	7 September 2025	Date Last Updated:	21 September 2025

Actor:	Admin
Description:	Allows Admin to review event creation requests submitted by Users and decide whether to approve, reject, or request more information based on the event's description and purpose.
Pre-Conditions:	<ol style="list-style-type: none"> <li>1. Admin is logged into their HobbyHive account.</li> <li>2. One or more event creation requests have been submitted by Users.</li> </ol>
Post-Conditions	<ol style="list-style-type: none"> <li>1. The event creation request is approved or rejected or set to "pending additional information."</li> <li>2. The requesting User is notified of the respective decisions.</li> </ol>
Priority:	High
Frequency Of Use:	High
Flow Of Events:	<ol style="list-style-type: none"> <li>1. The system displays a list of event creation requests to the Admin.</li> <li>2. Admin selects a event creation request to review.</li> <li>3. The system displays the event details, including its description.</li> <li>4. Admin reviews the details and chooses one of the following actions:             <ol style="list-style-type: none"> <li>4.1. <b>Approve</b> the request</li> <li>4.2. <b>Reject</b> the request</li> <li>4.3. <b>Request more information</b> from the Host</li> </ol> </li> <li>5. If the Admin selects <b>Approve</b>, the system updates the event's status accordingly and notifies the User of the decision.</li> </ol>
Alternative Flows:	<p><b>AF-S5a:</b> Request more information</p> <ol style="list-style-type: none"> <li>1. Admin determines that the event description is insufficient or unclear.</li> <li>2. Admin selects "Request More Information."</li> </ol>

	<p>3. The system notifies the User to provide additional details.</p> <p><b>AF-S5b:</b> Reject offensive or unrelated event</p> <ol style="list-style-type: none"> <li>1. Admin identifies offensive, inappropriate, or unrelated content in the event description.</li> <li>2. Admin selects “Reject.”</li> <li>3. The system notifies the User of rejection and provides a reason.</li> </ol>
Exceptions:	None
Includes:	None
Extends:	None
Special Requirements:	<ol style="list-style-type: none"> <li>1. All event descriptions must be stored securely and remain editable only until Admin takes action.</li> <li>2. Notifications to Users must be sent in real-time.</li> </ol>
Assumptions:	User has submitted the complete initial event creation request before Admin review.
Notes and Issues:	None

### IV.III ModerateEvents

Use Case ID:	#4-3		
Use Case Name:	ModerateEvents		
Created By:	Jain Divisha	Last Updated By:	Ishita
Date Created:	7 September 2025	Date Last Updated:	23 September 2025

Actor:	Admin
Description:	Allows Admin to review and moderate inappropriate or <b>already created</b> problematic events on HobbyHive by removing those that violate guidelines, promote illegal activities, contain misleading information, or receive multiple user reports.
Pre-Conditions:	<ol style="list-style-type: none"> <li>1. Admin is logged into their HobbyHive account.</li> <li>2. One or more events are flagged or reported for review.</li> </ol>
Post-Conditions	<ol style="list-style-type: none"> <li>1. The inappropriate event is removed, or its status is updated to “Reviewed”.</li> <li>2. Relevant Users (e.g., event creators or reporters) are notified of the action.</li> </ol>
Priority:	High
Frequency Of Use:	Medium
Flow Of Events:	<ol style="list-style-type: none"> <li>1. The system displays a list of flagged or reported events to the Admin.</li> <li>2. Admin selects a event for moderation.</li> <li>3. The system shows details including description, schedule, reports, and flagged content.</li> <li>4. Admin reviews the details and chooses one of the following actions:             <ol style="list-style-type: none"> <li>4.1. Remove the event</li> <li>4.2. Keep the event</li> </ol> </li> <li>5. If the Admin clicks on <b>Remove</b>, the system removes the event listing from HobbyHive and notifies the creator and, if applicable, the reporting Users.</li> </ol>
Alternative Flows:	<p><b>AF-S5:</b> If the admin clicks on <b>Keep</b></p> <ol style="list-style-type: none"> <li>1. The system updates the event status to “Reviewed” and notifies the creator and, if</li> </ol>

	applicable, the reporting Users.
Exceptions:	None
Includes:	None
Extends:	None
Special Requirements:	All moderation actions must be logged with timestamps and Admin's username for audit purposes.
Assumptions:	Events can be reported by Users or flagged automatically by the system.
Notes and Issues:	None

## V. For Functional Requirement #5 (Group Chats)

### V.I GroupChatManagement

Use Case ID:	#5-1		
Use Case Name:	GroupChatManagement		
Created By:	Swetha Sudhakar	Last Updated By:	Swetha Sudhakar
Date Created:	8 September 2025	Date Last Updated:	8 September 2025

Actor:	System, Host, Participant
Description:	Handles the lifecycle of event group chats, including creation, membership, and closure.
Pre-Conditions:	An event must exist.
Post-Conditions	Group chat is created, managed, and eventually closed.
Priority:	High
Frequency Of Use:	High
Flow Of Events:	<ol style="list-style-type: none"> <li>When a Host creates an event, the system generates a group chat.</li> <li>Participants are added once they join.</li> <li>Participants are removed when they leave.</li> <li>Group chat closes after event cancellation or one month post-event.</li> </ol>
Alternative Flows:	<b>AF-S1:</b> If chat cannot be created, the system retries.
Exceptions:	Chat service failure will show “Group chat unavailable.”
Includes:	ManageGroupChatMembership, CommunicateGroupChat
Extends:	None
Special Requirements:	Chats must support real-time messaging.
Assumptions:	All users have access to messaging features.
Notes and Issues:	Need to consider data retention policy for chat logs.

## V.II CreateGroupChat

Use Case ID:	#5-2		
Use Case Name:	CreateGroupChat		
Created By:	Swetha Sudhakar	Last Updated By:	Swetha Sudhakar
Date Created:	8 September 2025	Date Last Updated:	8 September 2025

Actor:	System
Description:	Automatically creates a group chat for each new event.
Pre-Conditions:	A Host successfully creates an event.
Post-Conditions	A group chat linked to the event is created.
Priority:	High
Frequency Of Use:	High
Flow Of Events:	<ol style="list-style-type: none"> <li>1. The Host creates an event.</li> <li>2. The system generates a unique group chat ID.</li> <li>3. The chat is linked to the event.</li> </ol>
Alternative Flows:	<b>AF-S1:</b> If creation fails, retry the process.
Exceptions:	Chat service error.
Includes:	None
Extends:	None
Special Requirements:	Group chats must be unique per event.
Assumptions:	The chat system is integrated with the event service.
Notes and Issues:	Consider scalability if many events are created.

### V.III ManageGroupChatMembership

Use Case ID:	#5-3		
Use Case Name:	ManageGroupChatMembership		
Created By:	Swetha Sudhakar	Last Updated By:	Swetha Sudhakar
Date Created:	8 September 2025	Date Last Updated:	8 September 2025

Actor:	System, Participant, Host
Description:	Controls adding/removing users from group chats based on join/leave actions.
Pre-Conditions:	Event exists and a group chat is created.
Post-Conditions	Group chat membership is updated accordingly.
Priority:	High
Frequency Of Use:	High
Flow Of Events:	<ol style="list-style-type: none"> <li>1. The participant joins an event, and the system adds them to the group chat.</li> <li>2. Participant leaves, the system removes them.</li> </ol>
Alternative Flows:	<b>AF-S1:</b> If the Host removes a participant, the system notifies them.
Exceptions:	Membership sync error, which leads to delayed updates.
Includes:	None
Extends:	None
Special Requirements:	Membership must be updated in real time.
Assumptions:	Hosts/Participants follow group chat rules.
Notes and Issues:	Ensure proper logging for auditing.

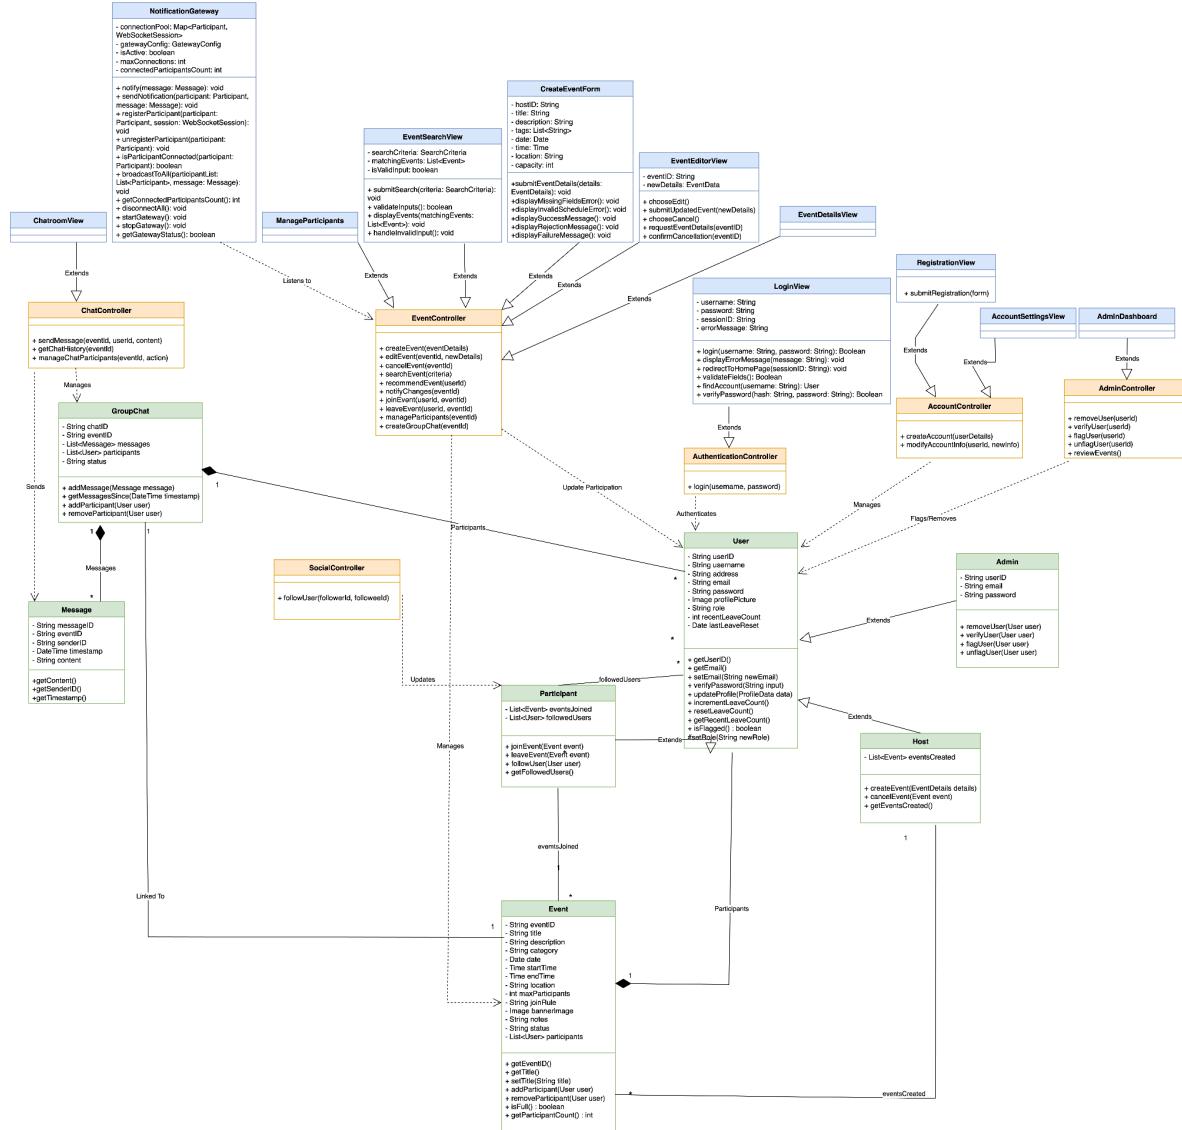

## V.IV CommunicateGroupChat

Use Case ID:	#5-4		
Use Case Name:	CommunicateGroupChat		
Created By:	Swetha Sudhakar	Last Updated By:	Swetha Sudhakar
Date Created:	8 September 2025	Date Last Updated:	8 September 2025

Actor:	Host, Participant
Description:	Allows Hosts and Participants to exchange messages in the group chat.
Pre-Conditions:	User must be part of the group chat.
Post-Conditions	Messages are delivered to all chat members.
Priority:	High
Frequency Of Use:	High
Flow Of Events:	<ol style="list-style-type: none"> <li>1. User types a message.</li> <li>2. System transmits message.</li> <li>3. All members see the message in real time.</li> </ol>
Alternative Flows:	<b>AF-S1:</b> If message fails to send, system retries.
Exceptions:	Connectivity issue.
Includes:	None
Extends:	None
Special Requirements:	Must support text of up to 256 characters per message.
Assumptions:	Users communicate respectfully.
Notes and Issues:	Consider adding media support in the future.
